April 27, 2020

Community Survey for Novel Coronavirus (COVID-19)

Miami County residents now have access to an online survey to report their health condition to the Miami County Health Department. People should complete the survey for every member of the household, whether or not they currently have symptoms of COVID-19.

Take the online survey at: <https://redcap.kumc.edu/surveys/?s=NPP3JNP39D>

The survey will only take a few minutes to fill out, and it will ask a few questions about the respondent's demographic background, current health status, potential COVID-19 symptoms and profession. If the respondent is currently symptomatic, it will also ask if they would like to be tested. If the respondent indicates interest in testing, further demographic information is collected for the purposes of pre-filling laboratory requisitions for more efficient service at a testing site, and if selected, that person will be contacted with a location and time for testing, tentatively scheduled for early next week.

This survey is not intended to replace medical care or advice from a medical professional. The information gathered by the survey is confidential and will only be used to determine how the coronavirus is spreading locally, and to invite those who are currently symptomatic to be tested for COVID-19.

Stay up-to-date by following Miami County Health Department Facebook page, or by visiting Kansas Department of Health and Environment's COVID-19 Resource Center webpage. For more information on COVID-19, you can also visit www.cdc.gov/COVID19.
