

Gardner, Ks

INTRO

My name is Jerot Pearson, 30943 W 215st St. I reside in the area being considered for Golden.

I am also the developer of the HP subdivision in the NW corner of the county.

HP also is entirely in the are being considered for Golden.

I am appreciative of MICO and the County departments working with me to develop and complete the project. I believe it is good for the area.

I am for the formation of Golden because I feel that it gives me, the residents of HP and the citizens of the area the best control of our property and rights.

METRO

With the metro area growth putting pressure on this area, any land that is unincorporated is at risk of being violated or succumbing to control of outside forces. Incorporation is the best protection against this.

SUPPORT

It is obvious there is tremendous support for this movement. The majority of the people are supporting it and speaking out. Primarily because they know there is long term risk to their livelihood. There will always be opposition to things like this but in this case the opposition is a small percentage or the opposition is actually not even in the proposed City or country for that matter.

REQUEST

I ask that all of the commissioners representing the people allow us to incorporate Golden which would give us the best structure for future control and protection of our property.
